

Applied Airforce – An Extreme High Volume Air Blow Gun

Variant Datasheet

The Applied Airforce is an extreme high-volume air blow-down gun for fast, effective cleaning of machinery and equipment. Connected to an Applied Varimount, portable diesel air compressor, or other large-output air compressor, it delivers powerful air to clear dust, debris and stubborn material. Ideal for blowing down blast rooms and blowing off items after blasting, it is faster than sweeping and safer than improvised pipe-and-valve systems.

Key Features

Specifications	
Body construction	Die-cast aluminium, machined brass and stainless steel
Recommended inlet pressure	At least 90 psi
Recommended hose ID	At least 1/2 inch
Air consumption	135 CFM at 100 psi
Trigger	Extreme Ease power-assisted trigger requiring minimal force to operate

Variant Information

Variant table for selected product options

Variant Information					
Product Code	Description	Thread	Connection	Material	Pressure Rating
AL-A-0001	Standard Airforce blow gun with long lance assembly	1/2 in BSP	Claw coupling	Aluminium	100 psi
AL-A-0002	Short lance version for compact cleaning areas	1/2 in BSP	Claw coupling	Aluminium	100 psi
AL-A-0003	Heavy-duty nozzle version for aggressive debris removal	3/4 in BSP	Claw coupling	Aluminium	100 psi
AL-A-0004	Extended reach version for large machinery access	1/2 in BSP	Claw coupling	Aluminium	100 psi
AL-A-0005	Compact trigger assembly with standard air lance	1/2 in BSP	Claw coupling	Aluminium	100 psi
AL-A-0006	Large-diameter configuration for increased air movement	3/4 in BSP	Claw coupling	Aluminium	100 psi

This product is covered by a 12-month warranty against defects in materials and workmanship.

Shipping Information

The Applied Airforce variant range is shipped as individual packages. Packaging dimensions and weights are listed in the variant information table where applicable.
